

Utility by diversity level: MMR vs PL vs the original deterministic list
(task-aligned bins: only (task, bin) cells where both methods have data)

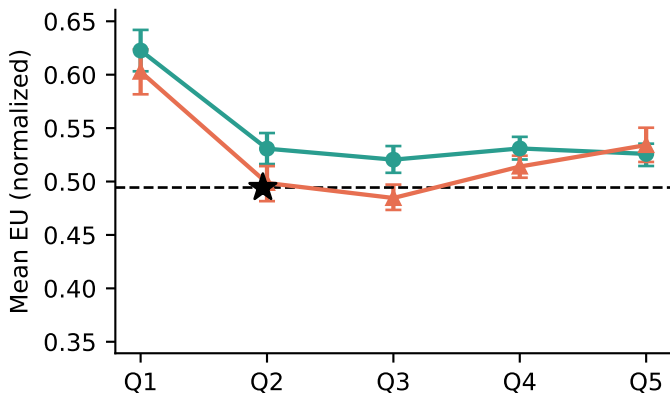

flan-T5-small (77M) / BM25

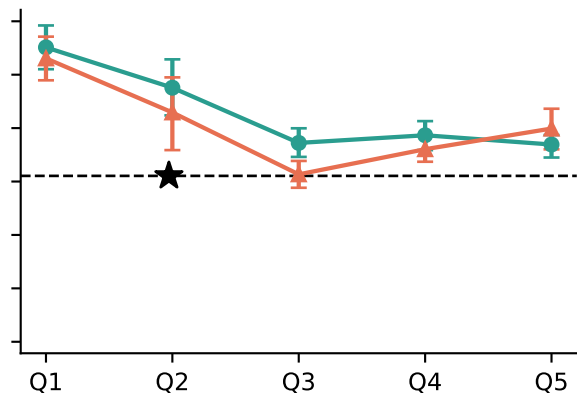

flan-T5-small (77M) / Contriever

flan-T5-base (250M) / BM25

flan-T5-base (250M) / Contriever

Diversity level (ILD quintile, Q5 = most diverse) Diversity level (ILD quintile, Q5 = most diverse)

--- deterministic (original list) MMR (diversity-focused) PL (fairness-controlled stochastic)
